Experience

Kohalpur Services Hub   Kohalpur, Nepal
Software Development Intern: 2020-2022
- Developed responsive landing pages using HTML, CSS, and JavaScript to achieve specific campaign goals.
- Increased lead generation by 60% through effective landing page design and functionality.
- Leveraged knowledge of front-end development to build visually appealing and user-friendly landing pages.
- Independently learned Python following senior recommendations to expand skillset.
- Built Django projects to gain experience in back-end development (Blogging Web App, URL Shortner and ToDos and many more).

Trilokya Technology   Kathmandu, Nepal
Junior Django Developer   March 2023 – March 2024

- **Developed and maintained** backend logic and functionality for various web projects using Python, Django, and related technologies (HTML, CSS, JavaScript, Bootstrap, MySQL, Git, Django and DRF).
- **Collaborated** with front-end developers, designers, and project managers to ensure seamless UI/UX integration with the backend.
- **Implemented** business logic, managed databases (MongoDB), and integrated APIs (Stripe, Xero) to facilitate smooth data flow and user interactions.
- **Contributed** to the entire development lifecycle, including requirements analysis, architecture design, coding, testing, and deployment.
- **Built** scalable and secure web applications using Python and Django expertise.

Projects:

- **Rosterme (SAAS Application for Steady Staff):**
  - Developed a system to track employee work records, generate timesheets, and manage payroll.
  - Integrated Stripe for secure payment processing and Xero API for automated payroll tracking.
- **Tech Asset Management System:**
  - Built a system to maintain and manage IT assets (hardware, software, documents, services).
- **Steady Talents (Connecting Clients with their Employee and making Jobs available)**

Arba Solutions   Kathmandu, Nepal
Django Developer   Present

- **Maintained and managed** a CMS application built with Django Wagtail and Django-tenants for various client projects.
- **Enhanced** features of an in-house HRMS software using Django, improving functionality (Adminlte Dashboards, Real Data Display, Holiday Calculations, Payroll Calculations and others).
- **Developed** client-facing quiz applications using Django.
- **Collaborated** with Flutter developers by providing essential REST APIs for seamless integration.
